PROPOSED THESIS TOPIC

The proposed thesis will aim to construct an explicit map between the Grothendieck-Teichmüller group and the Kashiwara-Vergne group using a combination of knot theory and homotopy theory. This will extend preliminary work done in the MSc thesis.

EDUCATION

Doctor of Philosophy (Mathematics and Statistics)
University of Melbourne & University of Sydney (2021-Present)

Master of Science (Mathematics and Statistics)
University of Melbourne (2018-2020)

Bachelor of Science (Mathematics and Statistics)
University of Melbourne (2015-2018)

RESEARCH EXPERIENCE

MSc Thesis

University of Melbourne (2020)

Supervisor: Dr Marcy Robertson

Title: Symmetries of trivalent tangles: Approaching the link between Drinfeld associators and Kashiwara-Vergne solutions

Description: Constructed a novel sub-set of welded foams to explore how the Grothendieck-Teichmüller group sits inside the Kashiwara-Verge group.

Vacation Research Scholarship Poster

University of Melbourne (Jan-Feb 2018)

8-week research project resulting in a poster presentation.

Supervisor: Dr Marcy Robertson

Title: Surface braid groups and mapping class groups

Description: A brief exploration of the connection between braid groups on surfaces and mapping class groups.

GRADUATE AWARDS AND SCHOLARSHIPS

John and Allan Gilmour Research Award (2022)

University of Melbourne

\$4,158.80 one-time award.

Awarded to two graduate students in the Science Faculty once a year.

The John and Allan Gilmour Research Award was established through the generosity of Mr John Gilmour of North Melbourne in 1958, to promote medical and scientific research at the University of Melbourne.

Master of Science (Mathematics and Statistics) Scholarship (3 times)

University of Melbourne

Awarded Semester 2 2018, Semester 1 2019, and Semester 2 2019

\$2000.00 a semester (For a maximum of 3 semesters)

Awarded for achieving an average mark above 75% for the semester in Master of Science (Mathematics and Statistics).

PUBLICATIONS AND PRE-PRINTS
